Dear Friends,

August, 2019

Gold has been responding favorably to the trade and currency war. We are seeing appreciation in Gold values that have finally broken out of the doldrums of the past six years. Currencies in have been losing value in India, Japan, Canada , Australia and the United Kingdom. This has created a teeter totter effect with Gold now rising higher quickly, 16% in U.S. dollars so far in 2019. The ratio of Gold/silver is still nearly 90. Globally, there are several factors which should continue Gold's strength for quite a while.

China has since 1997, has had its own unique form of capitalism. The economy due to Chinese investment and speculation has been strong and with a stable market. This is being shaken up now. The proposed extradition law is feared to expose Hong Kong based foreign executives. This would mean the Chinese authorities could come in and seize business and people for political reasons which translates to whatever they can dream up to fit their purpose. They would then be extradited to China to face trial. Hong Kong had been operating mostly under its own procedures and code, and this law is undermining that code.

We don't think this is or will be an isolated event throughout the world's most prominent countries. There is a certain unrest that we have not known before. Prepare your-self. Invest at least 20% in physical precious metals. **800-494-4149**

"The world right now is in a precarious state and gold is due to benefit from this situation," With the world – from Asia to Europe, the United States and a long list of emerging countries – now acutely attuned to gold ownership, it might not be long until we begin to see strains on the limited physical supplies." ~ Howie Lee, an economist at Singapore's Oversea-Chinese Banking Corporation in interview on CNBC August 6th.

Nearly 10,000 taxpayers who are cryptocurrency holders will be receiving letters from the IRS by the end of August to warn them that they might owe on transactions involving digital money. These letters are 6173, 6174, and letter 6174-A respective to the severity of the issue in question.

The existing guidance, IRS Notice 2014-21, said that for the purposes of federal taxation, virtual currency is property. When a user purchases cryptocurrency at a given price and then later trades it away — whether by buying a coffee or by selling it on an exchange — the sale is subject to capital gains tax because it is considered property.

Failing to report the transaction to the IRS could expose the user to criminal and financial penalties.

For those who have received notices, Green said, the best next step is to request your wage and income transcript, which shows all of the data the IRS receives, over the past few years. You may owe taxes on the full amount, but you may not.

"Do not freak out," she said. "But you do need to take action. Get a copy of your transcript. Call a tax professional and amend your return if you need to." by Brian Fung and Anna Bahney CNN Business Updated 4:39 PM ET, Fri July 26, 2019

Gold, in spite of a stronger U.S. Dollar last month has continued to gain favor and grow stronger. Just last week it pushed past the \$1500 mark to six year highs. This is still far below the prices of 2011-2012 and we expect to see the metals values reach the old highs and beyond in the next short years. Stock up your vaults and safes!

There are a few places that we have recommended for storage of precious metals. One that we liked to use when we were in Arizona, was **The Vault**. Since it was only a couple of miles from our office, they were not only safe and reliable but very convenient. We are happy to share that they now offer even better storage for our metals clients who might be out of the area.

You can call Rod at 602-288-9150 for more information or go to the website TheVaultAZ.com for more information.

You can now have your metals shipped directly to The Vault for storage in their state of the art vault facility.

HOW IT WORKS

1. Purchase your favorite products from your gold and silver dealer (RCI 800-494-4149)
2. Choose The Vault to store your valuables
3. Choose the size safety deposit box that best suits your needs
4. The Vault will email or fax a contract for your signature
5. Return the signed contract by email or fax
6. Have your gold and silver dealer ship your items directly to The Vault
7. The Vault will verify the contents of the shipment with video documentation
8. The Vault will place your items in your private safety deposit box

KEY DETAILS

Every box comes with two identical customer keys

Entry to boxes requires both a customer key and The Vault master key

A one-time \$75 administrative fee is required for The Vault management, receipt, and placement of your items.

The Vault may retain your keys for ease of executing additional purchases and sales for no additional fees. (Note: shipping fees are managed by your bullion provider)

You may take possession of customer keys at anytime. A one-time \$75 key & lock deposit is required at the time you receive the keys.

Visit the TheVaultAZ.com for complete information about The Vault, security box sizes, availability, and prices.

~ courtesy of Arch Crawford~ Our strong BUY Signal for GOLD in our June 3 CP newsletter turned out to be quite prescient, beating the majority of technicians who were waiting for the long-term breakout above 1365-75. We were convinced that the sky patterns were the most positive for the Precious Metal than ANY time in recent years! We are now getting a strong follow-through with new highs on Friday. This break-out is such a powerful and meaningful event in terms of GOLD/DOLLAR. GOLD has already made new highs in terms of the weaker currencies of Canada and the UK. A new high for US comes in about \$1925. The minimum count for the size and length of this huge bottom formation, now aged six years, is around \$1950. We believe the maximum will be several thousand more dollars. It's NOT that GOLD is worth so much more, it's that all the world's Fiat Currencies totally lack ANY real intrinsic worth, and are backed only by the "full faith and credit" of their respective governments. With the approach of Saturn to the position of Pluto in Capricorn, governments will be toppling all over the place during the next 3-5 years. The first conjunction in Ecliptic Longitude will be January 12, 2020. We have already been experiencing these conjunctions in North-South orientation as "parallels" in Declination. Our opinion is that greater than normal international anxiety is accompanying the rise of China as a world power, even though we have supported their progress more than any others. The COMMODITIES are on the verge of breaking down through some major supports at the June lows and may also threaten the December/January lows below 170 on the CRB Index. Mr. COPPER with his PhD in predicting world economies has the worst technical price action of all, a serious indication of wide-spread economic distress approaching rapidly ~ RAWFORD PERSPECTIVES, - 6890 E. Sunrise Drive, Suite #70, Tucson, AZ 85750-0738 Tel. (520) 577-1158,

Three central banks this month, India, New Zealand and Thailand, have lowered their interest rates. Trade wars have been shifting towards currency wars. Domestic and global interest rates could likely be diving towards the negative. This would cause new all-time highs in the price of gold. Some expect it to surpass the August 22, 2011 high of \$1900.

The U.S. 30 year bond fell below 2% for the first time ever. Who does this hurt most? Banks! Courtesy of stockcharts.com

Once in a while our clients call us to ask about ads or phone calls they might have received. Sometimes, the ad is legit and oft times not. We want to give you a heads up on the one sent to us today. It was a full page ad complete with lots of photos; Titled **U.S. zip codes turn up silver for residents** stating they had U.S. silver vault bags at just \$290 each. It turns out what they are touting as a deal just for specific lucky zip codes is half oz. silver bars at nearly 3 times what they should be going for! **SCAM!** Please be very careful. If it looks too good to be true, be very suspicious! Call us any time; we are Resource CONSULTANTS for a reason.

RECOMMENDATIONS

Physical gold is what investors seek as a hedge against inflation or a decline of a currency. For instance, the U.S. dollar. When a currency falls which is usually due to the printing of too much of it, it creates higher prices in imports and inflation. When there is a decrease of the money supply, it leads to deflation.

Gold has also been used as a hedge against deflation. A couple of examples are the Great Depression of the 1930s and more recently and to a lesser but still impressive degree, the crash of 2008 when the stock market declined and the price of gold continued higher. In any case, people who held physical Gold and Silver rather than just paper assets found themselves holding on to a sturdy life preserver in the storm that sunk and destroyed many who had none.

There are some who are concerned that the next recession is imminent. Recessions cause most everything to drop in value causing people to lose money in normal day to day purchases or intangible assets such securities and paper investments. Recovery from recessions is very slow. High unemployment rates occur along with worsened political tensions. This next one will be, in our opinion global. Normally, Gold prices trend up during recessions. The reason behind this is, during a recession, people turn to quality and tangibles. We all want to keep our hard earned money in something safer than what we might have taken a gamble on in prior periods.

GOLD~ CATEGORY ONE INSURANCE

Begin by buying Gold and Silver coins and bullion to protect your buying power. Because good is good, the items we recommend are pretty much the same in every issue. We always recommend for this category low premium pieces that are well recognized and easily liquidated.

Most modern Gold bars .9999 fine gold. They can be as small as 1 gram to a whopping 400 ounces in weight. One or five ounce Gold bars are what are requested most often. Kilo bars (32.15 oz gold) are sometimes asked for and available at low premiums but when purchasing precious metals you should also consider selling time. For instance, let's say a Kilo bar costs about \$50,000 with spot around \$1522. When Gold prices go to say, \$2000. per ounce, will you really want to sell all of that? Another consideration is shipping something that valuable in one box. In most cases the regular investor prefers smaller pieces for more flexibility. However, everyone has their own reasons and preferences and we will honor them and help you build your portfolio your way!

Modern government minted Gold Coins are what most Gold investors are stocking up on. The most common being the U.S. minted 1oz, 1/2oz, 1/4oz and 1/10oz Gold Eagle coins. They can be picked up in any quantity from single coins to 20oz rolls and Monster boxes of 500 ounces.

There are many others to choose from other than the ones we have pictured on the next page, so please ask if you have any questions or would like to have more variety to your collection. In fact, collecting Gold coins from around the world can be a very enjoyable as well as profitable endeavor in wealth protection.

U.S Gold Eagle

Austrian Philharmonic

Canadian Maple Leaf

South African Krugerrand

In the perilous times ahead make sure you have a life boat you can see, touch, and use. Physical precious metals can be the vehicle to get you safely to where you want to be. We are a full service precious metals company. If you don't see a photo of a particular item you might be interested in that does not mean it's not available! Call us we can nearly always find what you're looking for or better!

SILVER ~ CATEGORY ONE INSURANCE

Get your silver NOW! Silver is still ridiculously undervalued and readily available. However, that can and most likely will change as more and more are selling off other investments to avoid the paper market volatility and prepare for the possibility of a global Financial and Currency reset. Silver is the metal that most anyone can afford, thus, when the waves of investors hit the metals markets for safety, Silver tends to get snapped up rather quickly. This results in less availability and higher premiums. We liken Gold to a precious metals savings account. It is what you gather to keep your wealth and buying power secured until a future time when you could need it for something big. That being said, Silver can be thought of as a precious metals checking account. It affords the holder a means of securing purchasing power in smaller value increments for the smaller, day to day things that can a d do pop up.

We recommend at least one bag of 90% silver U.S. coin per person. They are available in \$1000. , \$500. , \$250. And \$100 Face Value Bags. We have described and explained these silver bags in several prior newsletters so won't go into as much detail again here. You can find most of our letters going back at least two years by clicking on the newsletter tab on our website www.buysilvernow.com . Or better yet, call us and we will be more than happy to help you know and understand everything we can about these pre 1965 U.S Silver coins.

Silver bars and rounds are other very low premium way to own silver. The most requested size silver rounds are one ounce and sold in 20oz tubes. However they can usually be acquired in fractional sizes also for a slightly higher premium. Silver bars are usually sold as 1oz 5oz 10oz or 100oz bars.

Most countries that mint the modern one ounce Gold Coins also mint Silver Coins. They are purchased in rolls of 20 or 25 ounce, depending on how the country of origin packages them. They are all available in monster box sizes of 500 as well. These are a favorite for Precious metals IRA accounts for those who would rather have silver stored for them. Another idea some of our clients like is to collect rolls from several countries.

PLATINUM
THE OTHER UNDERVALUED WHITE METAL

While Gold and Silver have always been used as real money, Platinum is one metal that is often much higher priced than Gold, but at this time is about half the price. These are the times we recommend anyone who has any interest in diversifying their metals portfolio to pick up whatever you can get your hands on! Call us for availability and prices. Both bars and coins are available. Some examples of the coins are shown here.

GOLD ~ CATEGORY TWO AND THREE
OLD U.S. GOLD COINS pre 1933

\$20 St Gaudens

\$20 Liberty Type

\$10 Indian

We love just about all of the pre 1933 U.S. Gold coins at this time! The premiums for these Extra Fine vintage Gold coins is close to bullion coin prices right now and some of the Mint State PCGS or NGC graded coins are absolute steals for Numismatic coins at this time! These semi collectable and collectible numismatic coins stand a very good chance of doing really good things for your precious metals portfolio. We get new specials most every day. Call often or tell us what you're looking for and we will do our best to make you happy you did!

I want to remind you to go to our website www.BuySilverNow.com often and check out THE BOX for current specials.

One more bit of housekeeping:

As you probably know, we are a national precious metals company and for over 2 decades have been in the business of educating and helping our clients acquire the

best metals to fit their needs *or liquidate their precious metals when they are ready to do so.*

Our newsletters are still free and we hope you enjoy them. Please call us at 800-494-4149 to help us to serve you better and update anything, name, phone numbers, mailing address, or email that is no longer current.

Because we have always offered our newsletter free and our subscribers have grown to about 7000 we needed to go to an email format to keep costs down. Sometimes, even though we have the correct email address the letters won't go through unless a reader has signed up online or added us to their address book.

If you or someone you know have not been receiving our newsletters online; *please* go to our web page www.buysilvernow.com . There, on the lower right-hand of the home page you will find a place where you can subscribe on line. That way your computer will recognize that it is OK to hear from us once a month or so. Also, again, I'd like to invite you to check out "THE BOX" on our web page often for current specials! And like and share our **Resource Consultants, Inc.** Facebook page.

Feel free to share with your friends or family. We appreciate your business, friendship and referrals.

Thank you to all of you who sent us emails and letters and called us with love and stories to share about Pat. It means so much to us. We are so blessed with these memories and with you as dear friends and clients. Resource Consultants, Inc. will be closed for the week of September 11th through September 17th to travel back as a family to celebrate Pat in his hometown of Owatonna Minnesota. We hope this doesn't inconvenience anyone too much. Please email us and you will hear back from us as soon as we are back in the office. We will be back on the 18th and continue on with renewed strength and ready to continue to serve you for many years to come. Thank you for your understanding and patience.

Thank you and God Bless...
Linda Gorman and the RCI family
