Dear Friends,

July, 2019

Gold is bought primarily for wealth preservation, rather than speculation. If one keeps an eye on monetary policy, it becomes easy to see that owning physical Gold could be about the best choice you can make for protecting your monies against economic risks. Throughout history, Gold has been the chosen asset used as a medium of exchange. This is because it holds its real value. Unlike fiat money, Gold has a stable intrinsic value and has no debt or liability attached to it. Gold carries a strong potential of sustaining an increase in value especially as a hedge against inflation. When the time comes, Gold is easy to liquidate. Gold can be a private way to pass on you wealth to your loved ones. Now could be the best time to get your portfolio on track for wonderful returns!

In financially perilous times people turn to Gold. We believe physical Gold and Silver should be the bedrock of nearly everyone's portfolio. Most metals investors hold or are aiming for 25% of their assets in Gold and Silver. Some have much more. However, if you are a newbie to the physical metals market, the prices are still great as is shown in the following chart.

Gold's 1980 High Today Equals A Staggering \$18,160 Inflation-Adjusted

The following insert courtesy of KWN :

Inflation-Adjusted Gold Price

Looking at gold on an inflation adjusted basis, 2000 was the lowest point since 1971 when the price was \$35 per ounce (based on Shadow Government Statistics inflation calculation).

The gold chart below, adjusted for real inflation, shows this amazing insurance can be bought today at an all-time historical low. Gold priced currently at \$1,400 is cheaper than in 2000 at \$280, cheaper than in 1970 when gold was \$35 or in 1780 when gold was traded in London at £4 per ounce.

The metals markets have started to wake up! Watch the central banks. They aren't stupid.

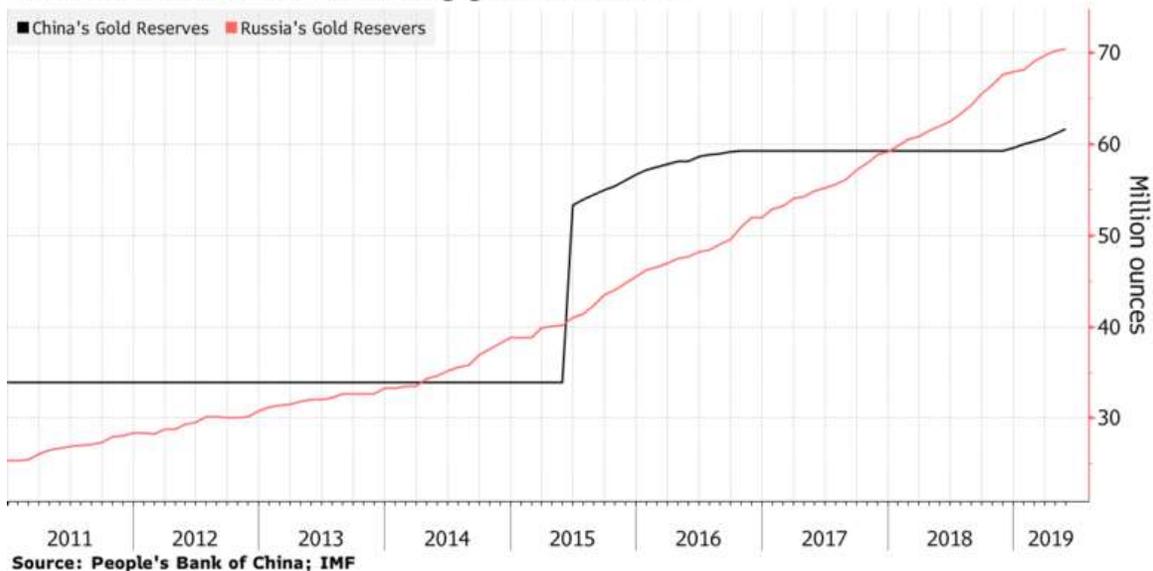

7-7-19 Bloomberg :

“Central banks are going after gold in 2019, boosting holdings as economic growth slows, trade and geopolitical tensions rise, and some authorities seek to diversify their reserves away from the dollar.

The People's Bank of China said Monday it raised reserves for a seventh month in June, adding 10.3 tons, following the inflow of almost 74 tons in the six months through May. Last week, Poland said it more than doubled its gold assets over this year and last, becoming the top holder in central Europe.

Bullion Stash

China and Russia continue adding gold to reserves

Bullion has rallied to a six-year high in 2019 as investors bet on rate cuts by the Federal Reserve, although robust jobs figures on Friday clouded that view. Gold purchases by central banks are adding to overall demand, with Russian authorities a substantial and sustained buyer of the traditional haven.

“Aside from its attempt to diversify its holdings of dollars, owning more gold reserves is also an important strategy in China’s rise as a superpower,” Howie Lee, an economist at Oversea-Chinese Banking Corp. in Singapore, said in an email. Additions are likely to continue in coming months, according to Lee.

Last year, central banks bought 651.5 tons, 74% up on the previous year, the World Gold Council said in January. Official sector purchases could reach 700 tons this year, assuming the China trend continues and Russia at least matches 2018 volumes of about 275 tons, Citigroup Inc. said in April. Buying from central banks in the first five months of this year is 73% higher than a year earlier, with Turkey and Kazakhstan joining China and Russia as the four biggest buyers, according to data released on Monday by the WGC.

China’s recent bullion accumulation, as well as that by other central banks, has come against a backdrop of firming prices. Spot bullion traded 0.4% higher at \$1,404.82 an ounce on Monday after climbing 9.1% in the second quarter.

This compares with gold’s peer of silver gaining just 1.3% over the same period, resulting in the ratio between the two metals increasing to more than 93, the widest since 1992. Central bank support for gold has been a key driver in the diverging fortunes of gold and silver, according to Ole Hansen, head of commodity strategy at Saxo Bank A/S.

The news on Poland’s increased haul last month included reference to half of its deposits being transferred to the eastern European nation from the Bank of England. This move “is likely due to the rapid increase in its holdings and the intent to build a reserve for the long term,” Hansen said, adding this reduced the need to keep its gold in the trading-market hub offered by London.

(Updates to add gold/silver ratio in seventh paragraph and Poland context in eighth.)”

The strength of the U.S. dollar is impacting the price of gold. However, Gold is still doing well. So far this year, Gold Value has gone up 11% with Silver still lagging behind. The normal ratio of silver to gold is 40-50 . at this time the ratio is more like 93! Silver will eventually bust loose and the ration will again tighten up. A boom in precious metals is forecasted. *Stay ahead of the herd and keep picking up and stashing away as much precious metals as you can prior to the rush to own. ~End~*

At this time, the stock market is witnessing the longest bull market in American history. Have you taken profits and invested in tangibles? Tangibles such as precious metals for instance? NOW is the time to stock up!

There has been much talk recently about the looming **Global Economic Reset**. This would result in the largest transfer of wealth in history. It has already begun. The dollar is beginning to be devalued. Gold prices are beginning to rise and you are about to see this escalate. July 10,2019 in an article by Greg Hunter they said the reset would be a two part reset. In the first reset, According to some of the most well respected economic minds today, Bill Holter and Jim Sinclair, The dollar is going much lower and will soon be sliced in half. This will buying power for the common Joe and Jane will be sliced in half.

“You need to look at gold, not a speculation, but as a savings account. If the dollar gets sliced in half, you basically double the value (of your gold) if not more. I think much more. . . . In the second reset, that will take gold to a price where it will balance the ability to pay global debt. That’s the major move coming forward. Right now, we are definitely going back to the \$1,850 and \$1,925 area per ounce for gold. The second reset, you can pick any price you want for gold. Pick a high price.”

The U.S. *is* going bankrupt, some politicians want to raise taxes and or make us a socialist country which will guarantee it happens sooner for all of us. We strongly recommend preparing now. Have at least three months supplies of whatever you need stashed , ready and available. This includes medicines, water, and food. Water purifiers are available and it would be good to have one.

CERT (Community Emergency Response Team) classes are available and free in some communities. They are taught by EMTs Fire department and Police. The program educates volunteers about disaster preparedness for the hazards that may impact their area and trains them in basic disaster response skills, such as fire safety, light search and rescue, team organization, and disaster medical operations. CERT offers a consistent, nationwide approach to volunteer training and organization that professional responders can rely on during disaster situations, which allows them to focus on more complex tasks. Through CERT, the capabilities to prepare for, respond to and recover from disasters is built and enhanced. We have taken them and found very helpful. We keep our CERT bag on the ready and have used some of the items and skills already.

SILVER CATEGORY ONE INSURANCE

We’ve already gone over in detail the 90% silver U.S. Coins. In our June letter. 90% U.S. Silver coins are still one of the best silver values available. Now we’d like to tell you again about some other choices in this low premium category. These are some you can purchase in your Precious Metals IRA too. The most popular is the United States 1oz Silver Eagle. These coins that were first minted in 1986 and continue to be produced each year contain 1oz of .999 fine Silver. They are packaged in mint rolls of 20 coins each or can be ordered in a mint sealed Monster Box of 500 coins which consists of 25 rolls of 20 coins each.

Silver bars are available in several sizes ranging from one ounce to 100oz. They are easy to stack and store as well as liquidate. These are very undervalued and make great gifts for any occasion.

One of our favorite stories re: Silver Bars was told to us by a sweet lady who just loved 100oz silver bars. She, (I’ll call her Edna) would pick them up whenever she could. One morning she called and said” Linda, I was robbed!” I said oh my goodness are you alright? Edna said “ Yes , I’m fine . they took my jewelry, but they

didn't get my silver." When I asked how she managed that, she replied that she had made covers for each of them out of counted cross stitch over plastic mesh like some crafters make to cover tissue boxes and had used them as door stops all over the house! The thief was found out to be the boyfriend of her housekeeper, which is why he knew exactly where she kept her jewelry but never suspected her doorstops were anything other than a covered brick!

The next most popular coins are the one ounce Canadian Silver Maple Leaf and the one ounce Silver Austrian Philharmonic. We have quite a few clients who like to pick up rolls of coins from several countries each year. They enjoy the diversity of design and fun of collecting something of real value. If this interests you, we will be happy to put together a collection of beautiful bullion coins from around the world.

How do you feel about fiat moneys? When Richard Nixon abandoned the Gold Standard in 1971, the dollar was no longer convertible into gold. This made our new fiat dollar vulnerable to inflation. It loses value in the presence of economic uncertainty and can drop in value to little or nothing if too much is printed. This has happened in several countries already. In the past 100 years we have witnessed the collapse of countries who, because of government interference and the flooding of fiat currencies devalued their money to the point of barely being worth the paper it was printed on. Examples: Starting even further back in first century Rome, with the Roman denarius, which was originally a 94% silver coin. By the time all of the Emperors had taken their little chunk out of the denarius it had only 2% silver content and became worthless as a currency there by bringing on the collapse of the Roman Empire .

France when down the road of hyperinflation 3 times! The last time, devaluing its fiat franc by 99%. Some other countries who failed or stumbled hard or fell economically at the expense of its people because of fiat money Argentina, Germany, China, Bolivia, Georgia and the list goes on. We don't have space to go in to all of them but the history is readily available.

The point is, fiat money is monopoly money, it can keep you in the game for awhile, but eventually the game is over and poof! You're left holding onto something that was pretend all along. Eventually, you're lucky if you can sell the whole game box at a garage sale to by popcorn.

We are not advocating getting out of all cash. What we are advising is to have a strong percentage of your wealth in something tangible, Owning physical Precious Metals could just be the one most important thing to own right now as a way to protect your wealth and purchasing power.

PLATINUM

Platinum, like silver is tremendously undervalued right now. Pick up 1oz Platinum bars or coins at this time. We feel palladium is not the best buy at the present prices.

“Paper money eventually returns to its intrinsic value: ZERO.” ~Voltaire

**GOLD ~CATEGORY ONE
INSURANCE**

The U.S. minted 1oz 1/2oz 1/4oz 1/10oz Gold Eagle coin

These are our favorites at this time. If you don't need as specific year, the one ounce Gold Eagles which normally have a little higher premium than the Canadian Maple Leaf or South African Krugerrand can be purchased now for about the same rate. They and several other Gold bullion coins can also be added to your Precious Metals IRA. Clients often ask for rolls of these coins. The large one ounce \$50 Gold Eagle is available in tubes of 20. The half-ounce \$25 Gold Eagle are packed in tubes of 40 coins, the 1/4 oz \$ \$10 Gold Eagle comes 40 to a tube and the 1/0oz \$5 Gold Eagle is in 50 coin tubes. They are also available in Monster Boxes or singles.

Call us **800-494-4149** and take advantage of any pullbacks quickly. Tell us your goals and intentions and we will help direct you to make them a reality.

We also are liking the prices of platinum right now. The ratio gold-to-platinum is about 1.64 , super low! If you don't have enough platinum, pick some up now. We feel that palladium is overpriced at this time compared to the other metals. However, we do buy as well as sell, so if you bought low you might consider converting some of your palladium to another metal.

Before we end this letter, I want to remind you to go to our website www.BuySilverNow.com often and check out THE BOX for current specials. We have been posting new offers a couple times a week lately and there have been some real doozies available. However, these are limited quantities and sell out quickly.

One more bit of housekeeping:

As you probably know, we are a national precious metals company and for over 2 decades have been in the business of educating and helping our clients acquire the best metals to fit their needs or liquidate their precious metals when they are ready to do so.

I'm writing to you because once a year or so we call to make sure that the contact information we have on file for our readers and clients stays up to date.

Our newsletters are still free and we hope you enjoy them. Please call us at 800-494-4149 to help us to serve you better and update anything, name, phone numbers, mailing address, or email that is no longer current.

Because we have always offered our newsletter free and our subscribers have grown to about 7000 we needed to go to an email format to keep costs down. Sometimes, even though we have the correct email address the letters won't go through unless a reader has signed up online or added us to their address book.

If you or someone you know have not been receiving our newsletters online; please go to our web page www.buysilvernow.com . There, on the lower right-hand of the

home page you will find a place where you can subscribe on line. That way your computer will recognize that it is OK to hear from us once a month or so. Also, again, I'd like to invite you to check out "THE BOX" on our web page often for current specials! And like and share our **Resource Consultants, Inc.** Facebook page.

Feel free to share with your friends or family. We appreciate your business, friendship and referrals.

Thank you and God Bless...
Linda Gorman and the RCI family

P.S. I am repeating much of our recommendations from last month because they are still true and I am pressed for time. This July has been both the best and the hardest of times, for us personally. We currently have a family emergency. Please keep us in your prayers. I will fill you in next month. Thank you.
